

Dear DHS Class of 1962,

I have been doing well teaching mathematics at Bel Air High School. I am teaching in a brand new Bel Air High School this year! I just love my new tiered- computer room with a huge flat screen TV and interactive promethean board to actively involve students in lessons! The students appreciate being in the new building and their motivation to learn has increased dramatically.

I continue to co-coach the Academic Team and we have big plans this year. With such a large team this year, 17 members, we plan on attending more tournaments in neighboring counties. We are excited to appear on WJZ's "It's Academic" this December. Also, we are holding our own Bel Air High School Invitational Academic Tournament this November. We expected over 20 teams to attend our tournament this year.

In addition, I plan to graduate with a Master's In Mathematics Education from Towson University this coming spring 2010. Once I finish this program I have plans to earn a second Master's in Administration.

Thanks for giving students at Dundalk High School a scholarship to help them in achieving their dreams! Your scholarship has made a difference not only in my life, but in the lives of the other winners. Thanks again for your contributions!

Sincerely,  
Katie Peterka  
Class of 2002
